

Preserve the Commons (PTC) is holding a new FREE Information Event

**Philipp Schmidt-Pathmann, MBA, MIS - Managing Partner at Neomer, Founding Member of Zero Landfill Initiative**

*Philipp's team of international experts focus on integrated sustainable waste management systems that include "zero waste," recycling, organics, thermal treatment technologies, landfill, sewage, material and resource management, environmental and economic impacts and ocean cleanup.*

Philipp has studied and analyzed U.S. waste management systems for more than two decades and given hundreds of educational presentations in North America and Europe. He has built a team of renowned technology experts, scientists, researchers, economists, political specialists, and many others focused on a holistic view of waste management.

Philipp will present the science behind the thermal decomposition of biosolids, successfully utilized throughout Europe. Please join us to learn how this knowledge might be applied to create a model facility in Thurston county.
